Open Source Projects — *IBM Open Source projects and others*

I am contributing to the IBM Cloud Open Source SDKs and Samples . I have my own repos as well for the personal development

WorkApps Chat — *iOS application, Appillary Solutions*

For all your one-on-one communication. It's Simple, Quick & Easy and has your colleagues automatically loaded when you login. It also connects you to the various departments of your Company with a single touch!

WorkApps — *iOS application, Appillary Solutions*

WorkApps is a work management platform where users can manage their tasks, collaborate on projects, communicate effectively with their teams and track & extract reports on key metrics, which help stakeholders make the right decisions.

MovieBuddy — *iOS application, Appillary Solutions*

MovieBuddy keeps you updated with upcoming movies, latest releases and blockbusters. You can see ratings and reviews from your very own people like family, friends, colleagues and send your recommendations to them as well. It allows you to watch trailers & songs, share your experience on FB and even plan a movie date with friends

Tithi — *iOS application, Appillary Solutions*

Tithi is the cool app to keep track of all the Indian festivals, special holidays and astronomical events through the year. It provides interesting information on every festival/ event and also allows quick filtering on dates and search text. You can also add the event in your calendar and send a wish or an e-Card to friends and family.

PushSender — *MacOS application, Side project*

Push Sender will help you to send push notification to your iOS , Android , Cordova mobile applications and to websites for Chrome , Firefox, Chrome Apps & Extension and Safari browsers . This is my side project.

Nucleus — *iOS application, AppZoc*

Nucleus Premium Properties is a Kochi-based builder and real estate developer with interests in building apartment, villa projects and developing land for construction. Nucleus App will give the users the latest news regarding new project features and other services of Nucleus Properties.
